Amshu Pokharel

Full-Stack Software Engineer · React · Next.js · TypeScript · Ruby on Rails

Kathmandu, Nepal · Open to remote roles · pokharelamshu@gmail.com · +977 981 907 8504 · udira-re.github.io · linkedin.com/in/amshu-pokharel-031016375 · github.com/udira-re

SUMMARY

Full-stack engineer with 4+ years shipping production web apps for European clients in education, healthcare, retail and beauty. Strongest in React, Next.js and TypeScript, and I also build Ruby on Rails APIs for payments, fiscal receipts and background jobs. Currently Full Stack Engineer at Lumetha, and lead frontend engineer (part-time) on a live Next.js subscription platform (~680 commits, 39 merged pull requests). I use AI tools such as Claude Code in daily development. Author of an open-source Ruby gem.

EXPERIENCE

Lumetha (formerly Kotuko Nepal) Jan 2022 – Present
Software house delivering web products for European clients *Kathmandu · Hybrid*

Full Stack Engineer Jul 2026 – Present
Frontend Developer (joined as Frontend Intern, Angular) Jan 2022 – Jul 2026

Own features end to end across React, Next.js and Ruby on Rails, review code and help set frontend standards. Work in agile teams with Italian product owners, backend, QA and design.

InBellezza: salon & retail management platform (backend)
Ruby on Rails · PostgreSQL · Sidekiq · Redis · ActionCable · Stripe · AWS S3

- Integrated Dojo card-terminal payments with webhooks, live status over ActionCable and a recovery job. Prevented duplicate receipts and validated amounts.
- Built a gift-card system (issue, redeem, expiry, history) and VAT rules for Italian businesses.
- Generated A4 fiscal receipt PDFs cached on S3, and exposed tax-authority (AdE) status in daily cash closing.
- Documented the v2 REST API in OpenAPI and self-hosted Swagger UI. Fixed Stripe error handling and stock/receipt edge cases.

Fegime: B2B back-office CMS
React · Redux Toolkit · MUI · React Hook Form · i18next

- Built push-notification templates for custom content, a content-approval page, bulk user actions and sortable data tables.
- Stopped duplicate records on every form page with a shared submit-state pattern. Maintained Italian/English translations.

Humanitas University: Transfer Portal
React · AWS S3

- Built dynamic application forms and admin dashboards, with role-based S3 uploads for sensitive documents, input validation and sanitisation, and GDPR privacy controls.

ISMEA: dynamic form management platform
React · Entando · CAS SSO

- Built a no-code back office for creating and publishing forms, and multi-step public forms with validation. Integrated CAS single sign-on for high-volume submissions.

Aida · Genesys · Complife · internal HRM
React · Three.js · Vue.js · Angular · Tailwind · MUI

- **Aida** (healthcare marketing): campaign dashboards, lead management and analytics modules.
- **Genesys** (3D printing): interactive 3D model viewer in Three.js, file upload and order tracking.
- **Complife** (Vue.js): document import and compliance workflows with dynamic forms. **HRM** (Angular): internal HR and office workflow tool.

Frontend Engineer (Part-time) Apr 2026 – Present

Product company (confidential) *Remote*

Family growth & learning subscription platform (client confidential)

Next.js · TypeScript · Zustand · TanStack Query · RHF + Zod · MUI · Tailwind · Firebase

- Lead frontend engineer (~680 of ~810 commits, 39 merged PRs). Built the parent portal and child learning journeys across five developmental phases, with lessons, emotion check-ins, history and growth charts.
- Built subscription plans, coupons, upgrade/downgrade flows and lifecycle-aware feature gating, all synced to the billing API contract.
- Hardened security with a server-verified PIN gate for the parent area, encrypted child IDs in URLs to block cross-account access, and a one-time-token password reset.
- Delivered real-time chat (Firebase) and a moderated community forum, plus downloadable two-page certificate PDFs (jsPDF/html2canvas).
- Built GDPR cookie consent: Google Tag Manager and Microsoft Clarity load only after consent, and sign-up and purchase conversion events are tracked.
- Contributed to the CI/CD pipeline: GitHub Actions builds Docker images and deploys to staging and production. Added Husky, lint-staged and Commitlint for consistent commits.

OPEN SOURCE & PERSONAL PROJECTS

codicefiscale_ruby, Ruby gem (rubygems.org/gems/codicefiscale_ruby) 2026

- Published gem that generates and validates the Italian tax code (Codice Fiscale). Object-oriented design, documented and semantically versioned.

Real-Time Chat App (github.com/udira-re/ChatApplication) 2025

- Next.js, Socket.IO and Zustand chat with instant WebSocket messaging and a responsive Tailwind UI.

SKILLS

Frontend	React, Next.js (App Router), TypeScript, JavaScript (ES2023), Vue.js, Angular, Three.js
State & Data	Zustand, Redux Toolkit, TanStack Query, Context API, React Hook Form, Zod, REST, WebSockets
UI	Tailwind CSS, Material UI, Chakra UI, responsive & accessible design (WCAG), i18n
Backend	Ruby on Rails, PostgreSQL, Sidekiq, Redis, ActionCable, Stripe, OpenAPI/Swagger, Firebase
DevOps & Tools	Docker, GitHub Actions, Bitbucket Pipelines, AWS S3, Vercel, Git, Jira, Claude Code
Quality	Jest, React Testing Library, ESLint, Prettier, code review, GDPR/consent, security hardening

EDUCATION

MBA in IT, Westcliff University (Presidential Business School), Kathmandu 2024 – Present

BSc (Hons) Information Technology, University of Sunderland (ISMT College), Kathmandu 2019 – 2023
